THE international conference **DANCE FUTURE II. CLAIMING CONTEMPORANEINITY** focuses on the concept of contemporaneity and how it impacts on the politics of culture and art and the related history concept in dance and dance studies. The key question of the conference deals with the global aesthetic and cultural processes of translation between Dance Theatre and Contemporary Dance.

The worldwide recognition of the Tanztheater Wuppertal serves as the point of departure: it initiated paradigmatic, historical, contemporary and aesthetic transformations and thereby, being a unique art form, caused reactions ranging from indifference to resistance.

International Conference
